

SMART | AFFORDABLE | EFFECTIVE

AUTOMATED PREPRESS WORKFLOW

Online collaboration with our Kodak InSite system ensures your print project runs smoothly and accurately every time.

InSite streamlines print production and the processes of job submission, collaboration, proofing, and job-status tracking. It reduces turnaround times, lowers proofing costs, enhances communications and offers exceptional visibility into the production process.

SECURE AND CONVENIENT ONLINE ACCESS TO YOUR PRINT JOBS

With InSite, you get secure FTP Web access to your print jobs over the Internet using a standard browser and a personalized log in. Upload and download jobs and job data from anywhere in the world – at a faster rate than traditional FTP sites. InSite uses pixel-streaming technology so even the largest files can be accessed via the Internet. Remember, all these pages proofed online also facilitate your green initiatives.

REMOTE PREFLIGHTING AND PROOFING

Preflighting begins the instant you submit a print job to InSite. The systems checks for problems and, if necessary, alerts you – and us – so that corrections can be made quickly. Because proofing is conducted

online, geographically dispersed users can collaborate through InSite simultaneously to speed the process. Users can append annotations or comments and approve or reject pages with ease with one click instead of with multiple hard-copy proofs.

REDUCE ERRORS & SHORTEN LEAD TIMES

When compared to conventional proofing, review and approval methods, InSite improves communications, reduces cycle times and minimizes errors because all job information is visible in real time and accessible from anywhere over the Web.

Online job submission provides greater flexibility in dealing with late-closing pages or last-minute changes. And bypassing hard-copy content-proofing cycles reduces lead times, materials and courier costs.

InSite provides fast, easy-to-use Web access to your prepress workflow, so you can stay informed about your job every step of the way, from anywhere, at anytime.
