

Simplifying Book Manufacturing

Perfect Bound | Case Bound | Smythe | Mechanical Binding | Kitting

Bang Printing Minnesota New Additions

Bang Printing's Minnesota facility will launch the first Timson T-Book digital press in the United States.

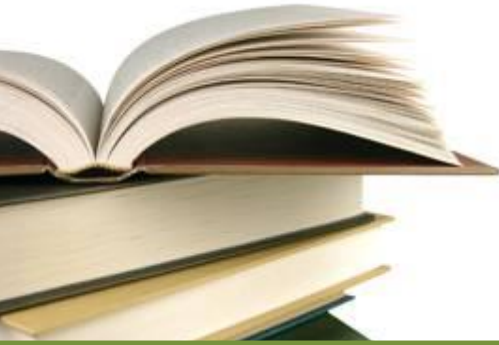

The T-Book not only offers the latest in wide format inkjet technology, but also takes into account the importance of maintaining a short web lead from paper to finished product. The flexible format, fast make-ready, high volume output device produces a wide range of formats in a perfect bound book or book block sizes.

The T-Book is designed for minimum make-ready at product changeovers, able to offer Zero Make Ready (ZMR) mode on consecutive jobs where there are no changes to book size and paper type. Size changes are fully automated via a Human Machine Interface (HMI).

At the heart of Timson T-Book, Kodak's Stream inkjet technology offers printing speeds of up to 200meters/min at 600 x 900 dpi in black only across a range of paper types and weights in web widths up to 52".

The digitally printed signatures are processed sequentially to form a complete book block or perfect bound book, with the Kolbus sequential feeder.

Ready First Quarter 2014

QUOTE OF THE MONTH:

"All earthly existence must ultimately be contained in a book."

-- Stéphane Mallarmé

We're excited to announce the recent addition of Victor Graphics of Baltimore, Maryland to our Bang Printing family!

This addition will allow us to provide our customers a more diversified suite of products and services. More details to come in first quarter of 2014.

Shows & Events

Bang Printing will be attending:

May 28-31, 2014

BEA
-New York, NY

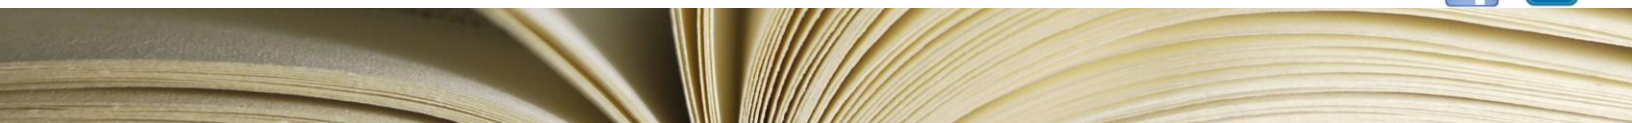

Hess Print Solutions will be attending:

March 8-11, 2014

NSSEA Ed Expo 2014
-Dallas, TX

Bang Printing West Coast New Additions

Akiyama Jprint Press

We recently added a high-performance 8-color sheet fed Akiyama Jprint 44 Perfector to our Valencia, California location. The new Akiyama is the same configuration we have at our Minnesota location and offers duplicate formats.

The innovative straight-through design of the Akiyama Jprint press will print both sides of the sheet in a single pass, using the same gripper edge through all units. This unique cylinder configuration, along with the closed loop color system, delivers the ultimate in printing excellence. With a sheet size of 32.25" x 44.125", it is capable of printing 4/4 colors on 2 sides. We look forward to the quality, consistency, productivity and efficiency that this Akiyama Jprint press will bring to our company and to our customers.

Roll Sheeter

We've added a sheeter to our Valencia, California location. This allows us to receive paper in rolls and sheet down to size, which reduces the cost to our customers.

Hess Print Solutions Ohio New Additions

Bindery:

- 30-Pocket Muller Martini Adhesive Binder, Kolbus Auto Palletizer with inkjetting and wrapping
- 12-Pocket Harris Saddle Stitcher with cover feeder, selective feeding, inline inkjet (inside/outside) and shrinkwrapping
